

Task 5 - Constraint Engineering Practice

Prompt 1 - Missing constraints

Length, structure, source accuracy and uncertainty handling.

Prompt 1 - Rewritten

Summarize this meeting in no more than 120 words. Use sections: Decisions, Action Items and Blockers. Use only information in the notes. If an owner or deadline is unclear, write 'Not specified' instead of guessing.

Prompt 2 - Missing constraints

Audience, length, metrics/source limit and structure.

Prompt 2 - Rewritten

Write a Q3 performance report for senior management in under 250 words. Use sections: Results, Problems, Risks and Next Actions. Use only the provided Q3 data and include important numbers. Clearly flag any missing or uncertain data.

Prompt 3 - Missing constraints

Review scope, output format, change limit and uncertainty handling.

Prompt 3 - Rewritten

Review this code for correctness, security and edge cases. List a maximum of 5 issues with severity and a suggested fix. Do not change unrelated code. If you are not sure an issue is real, label it 'Needs verification'.

Biggest impact

Output format and scope constraints had the biggest impact because the answer became focused and easier to use.

Rating

5 - Excellent
