

Task 4 - Build a Structured Output Prompt

I chose Scenario

Scenario B - Python code review report.

Context

I have a Python function and I want a clear review before I use it.

Role

Act as a senior Python backend developer and code reviewer.

Task

Review the function and identify correctness, security and maintainability issues.

Format

Numbered list.

Constraints

Do not rewrite unrelated code. Do not invent problems. Keep each explanation short.

Structured Output Specification

For every issue show: Issue Number, Severity (H/M/L), Description, and Suggested Fix. Maximum 6 issues.

Combined Prompt

I have a Python function that I want to review before use. Act as a senior Python backend developer and code reviewer. Find correctness, security and maintainability issues. Return a numbered list with Issue Number, Severity (H/M/L), Description and Suggested Fix. Give a maximum of 6 issues, keep explanations short, do not invent problems and do not rewrite unrelated code.

Follow-Up Turn

Now sort the issues from highest to lowest severity and show only the code changes needed.

Match rating

5 - Excellent
