

Task 2 — Responsible AI — Risk Scenarios

Top 5 AI data privacy risks

1. Private company data exposure.
2. Passwords and API keys.
3. Customer personal information.
4. Confidential source code.
5. Server and infrastructure information.

Scenario	Safe/Risky	Reason / Safe Alternative
Company payment code	RISKY	May contain private company code. Use a simple example.
JWT refresh question	SAFE	General question without private data.
nginx config with IP/domain	RISKY	Remove private server details first.
Describe null email bug	SAFE	No sensitive data is shared.
Customer CSV	RISKY	Remove/anonymize names and emails first.
Generic CSV parser	SAFE	General coding question.
AWS .env file	RISKY	May contain passwords and secret keys.
Database index strategy	SAFE	General technical question.
