

Task 4 — Build a Level-4 Expert Prompt

I chose Scenario

Scenario B — Backend Developer

CONTEXT

I am a backend developer and I have a Python function that processes payment transactions.

ROLE

Act as a senior backend developer.

TASK

Review the function and find problems.

FORMAT

Show each problem, explain it, then give improved code.

CONSTRAINTS

Check correctness, security and edge cases. Keep the explanation simple.

My Full Prompt

I am a backend developer and I have a Python function that processes payment transactions. Act as a senior backend developer. Review the function for correctness, security and edge cases. Show each problem, explain it simply, and then give me improved code.

Follow-up refinement prompt

Now make the code safer and add simple error handling.

Initial result quality

Good

After refinement

Excellent
