

Task 8 — Meeting Notes & Report Generation

Prompt 1 — Meeting Summary

Organize these sprint meeting notes into a professional summary with sections: Attendees, Key Decisions, Action Items with owner and deadline, and Blockers. Do not add information not in the notes.

Meeting Summary Result

Attendees: Ahmed, Sara, Khalid, Nour.

Key Decision: Launch moved from March 10 to March 17 because of the pipeline issue.

Action Items: Nour updates the client by tomorrow morning; Ahmed reviews Sara's frontend PR before end of week; Khalid gives a pipeline update at Friday standup.

Blockers: Sara is waiting for the API spec; staging deployment pipeline is broken.

Prompt 2 — Presentation Outline

Convert the same sprint meeting notes into a simple 5-slide presentation outline. Include project status, completed work, blockers, decisions and next actions.

Presentation Result

Slide 1: Sprint status and attendees.

Slide 2: Completed work — auth refactor and open PR.

Slide 3: Blockers — API spec and staging pipeline.

Slide 4: Decision — launch moved to March 17.

Slide 5: Action items and next sprint planning.
