

Task 9 — Document Analysis & Data Extraction

Prompt 1 — 5-Bullet Summary

Summarize this Sprint 14 report in exactly 5 bullet points. Each bullet must have a maximum of 15 words.

Prompt 1 Result

- Authentication refactor completed three days early.
- Payment integration passed all 47 tests.
- Dashboard is 60% complete but blocked by API spec.
- Staging pipeline issue blocks production deployments.
- Test coverage is 74%, below the 80% target.

Prompt 1 Quality

Ready to use

Prompt 2 — Action Items Table

Extract all action items into a table with: Action, Owner, Deadline and Priority.

Prompt 2 Quality

Ready to use

Prompt 3 — JSON Conversion

Convert only the Performance Metrics section into valid JSON. Keep all numbers and targets.

JSON Output

```
{"sprint_velocity":{"actual":42,"target":45,"difference_percent":-6.7},
"bugs":{"opened":7,"resolved":4,"open":3},
"code_review_turnaround_hours":{"actual":18,"target":24},
"test_coverage_percent":{"actual":74,"target":80,"gap":-6}}
```

Prompt 3 Quality

Ready to use

Prompt 4 — Risk Analysis

Find the main risks in this sprint report. For each risk, explain the impact and suggest one simple solution.

Risk Analysis Result

1. Broken staging pipeline — blocks deployments. Fix it as a priority and report progress daily.
2. Missing API spec — blocks Sara. Ahmed shares it by March 5.
3. Test coverage below target — increase coverage to 80% before review.

Prompt 4 Quality

Ready to use

Action	Owner	Deadline	Priority
Share API spec with Sara	Ahmed	March 5	High
Resolve pipeline issue	Khalid	March 7	High
Notify client of revised launch date	Nour	March 5	High
Increase test coverage to 80%	All	Before next sprint review	Medium
